

My-SafeRide

DTI supports the safety and well-being of students and staff during their school commute. That's why we've developed My-SafeRide, an innovative video surveillance and driver monitoring solution for school buses.

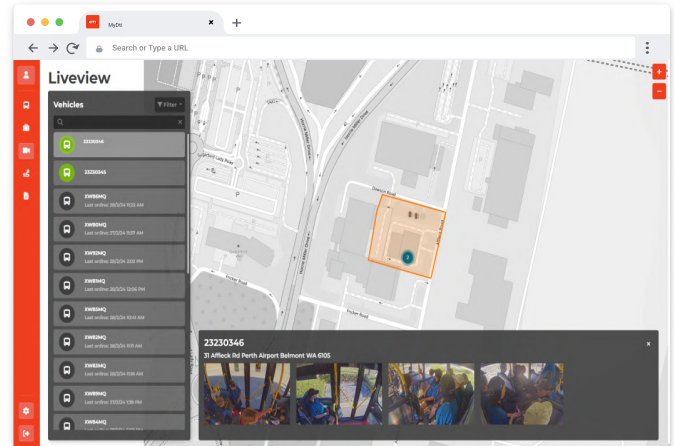

Features

My-SafeRide, DTI's school bus safety technology, bundles best-in-class video capture technology with incident management features, vehicle location and route history reporting, and artificial intelligence (AI) based driver monitoring.

Video capture

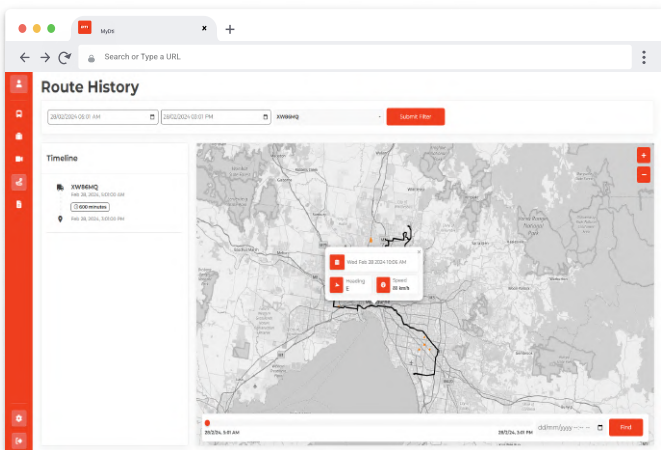

- Post incident review of student or vehicle incidents with audio capability.
- Acts as a deterrent for anti-social behaviour.

Incident management

Provides immediate oversight:

- Current location.
- Real-time video connection to multiple cameras.
- Capture of incident footage and audio.

Real-time vehicle tracking

- Current location.
- Historical routes.

AI camera technology

- Detects driver fatigue, inattention and other risky activities.
- Promotes safer driving practices and ensures optimal focus on student safety.
