DTI

My-SafeTransport

My-SafeTransport is a sophisticated vehicle system designed to prioritise passenger and operator safety, enhance the passenger experience and generate valuable fleet management insights.

My-SafeTransport is a suite of products tailored to fulfill the mission-critical requirements of bus-transit and coach operators.
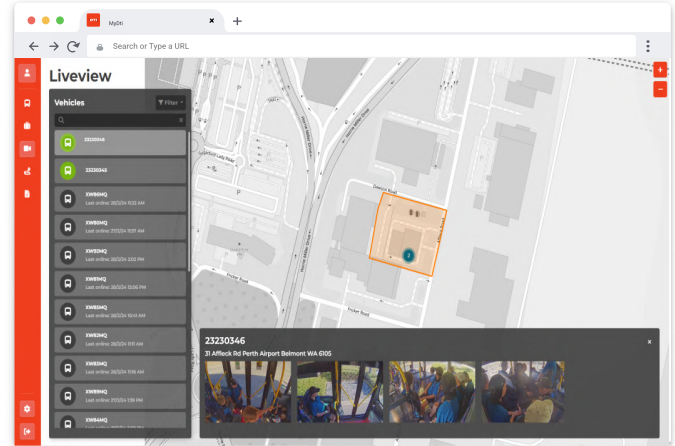

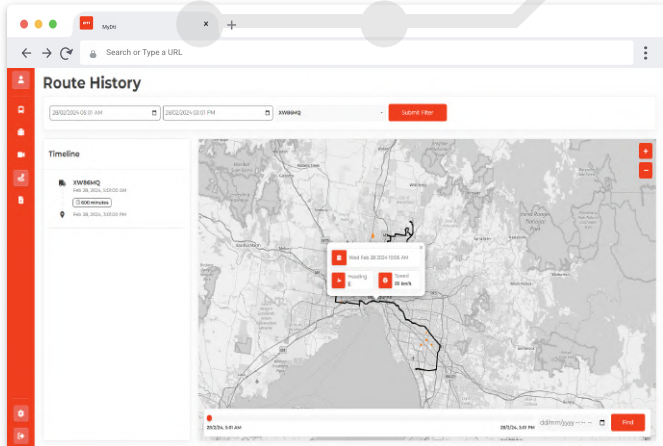

Features

Video capture

- Multiple cameras provide complete field of view coverage.
- A deterrent for anti-social behaviour.

Incident management

Provides immediate oversight:

- Real-time video connection to multiple cameras.
- Current location.
- Captures incident footage and audio.

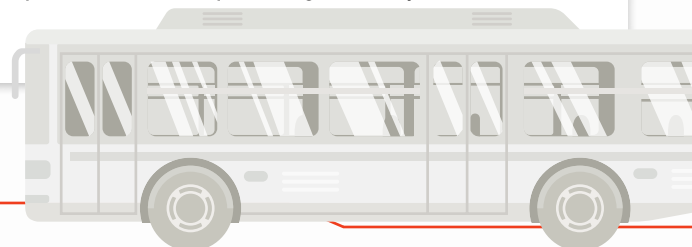

MyTeleTrack

DTI's vehicle telematics solution supports fleet management by providing:

- Current location/speed/direction.
- Previous routes.

DriveAware AI

- Detects driver fatigue, inattention and other risky activities.
- Promotes safer driving practices and ensures optimal focus on passenger safety.
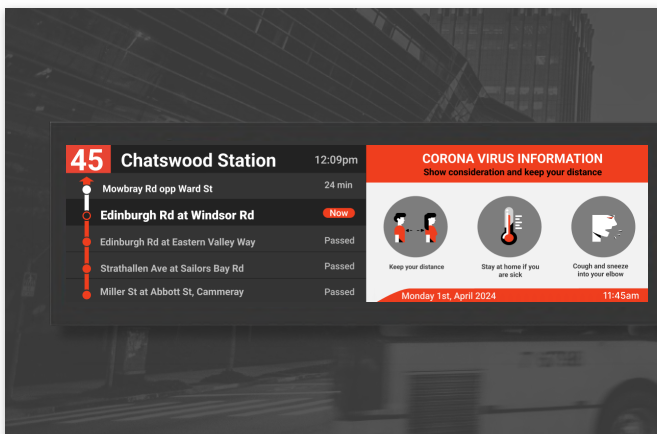

Features

Event-based activity capture & reporting

- Tailored events triggered via a driver duress button or other configurable settings.
- Vehicle transits through an operator defined geo-fence.
- Revenue assurance.

Passenger Counting

- Reports the on-vehicle passenger count.
- Reported on the driver display, enabling effective capacity management.
- Provides insights for capacity and network management.
- Revenue assurance.

Passenger Information

- Sophisticated digital displays report route progress, next stop information and public announcements.
- Operator managed vehicle route information and messaging.
- Integrated audio messages.
- Hearing aid loops.

Driver interface

- Route selection.
- Multiple camera views assist driver.
- Enhances safety.
- Helps reduce vehicle damage.
